# Careers in Science WebQuest

## INTRODUCTION

"When will I ever have to use this?" That’s a question that many students find themselves asking at some point in their schooling. This WebQuest is designed to help you find careers that use science. You will identify a career of interest, find out what kind of education you need, and how science is used in that career.

## TASK

Your task is to choose a career and investigate that career. You will gather information on that career and then put all the information together in a presentation that you will give to the class.

Your presentation **must** include the following:

1. **The Job Title.**
2. **A description** of the career.
   - What does a person in this career do?
   - How does it relate to science?
   - What knowledge and/or skills does the job require?
   - What is the job outlook for this career (growing, in demand, favorable, unfavorable)?
3. **The educational requirements** for this career.
   - Does this career require college or technical school?
   - If so, how long will it take to get the required degrees?
   - What types of course are required?
   - Are there ways to begin developing skills prior to high school graduation (i.e., summer camps, internships)?
4. **The salary range** for this career.
5. **Pictures** (of the job in action or other applicable photos/graphics)
You will create a power point presentation of your favorite Science Career

- Slide Show should have animation and slide transitions
  - Slide 1: Job Title
  - Slide 2: Career Description
  - Slide 3: Education Requirements
  - Slide 4: Skills Required
  - Slide 5: Salary Range
  - Slide 6: Positives of Job
  - Slide 7: Negatives of Job
  - Slide 8: Pictures of People doing the job.
